Address: Ho Chi Minh City

SUMMARY

Fresher Full-Stack Developer with internship experience at CTIN, focused on React and TypeScript. Built the user interfaces, business logic, and workflows for ticket creation and dynamic form modules in an internal support management system now in active use. Seeking a role focused on React front-end development and maintainable web applications.

WORK EXPERIENCE

Apr 2026 - Oct 2026

CTIN | Post & Telecommunication Informatics JSC
Front-end Developer Intern | TSS
Internal support management application used by internal users.
• Built the ticket creation and dynamic form modules using React, TypeScript, SPFx, and Fluent UI; both modules are in active use.
• Implemented the page interfaces, business logic, and workflows for both modules.
• Developed ticket forms with validation, file attachments, and request classification.
• Built configurable forms with multiple field types, required-field validation, and template previews; implemented template drafting, publication, and version management.
• Integrated SharePoint data through service and repository layers, separating UI state from business logic.

SKILLS

Languages	JavaScript (ES6+), TypeScript
Front-end	React, Redux Toolkit, React Router, Fluent UI, Bootstrap
Back-end	PHP, C#, Laravel, ASP.NET Core
Platforms & Data	SharePoint / SPFx, MySQL, SQL Server
Tools	Git/GitHub, Postman, Axios, Docker
English	Able to read technical documentation

EDUCATION

2024 - Present

Saigon College
Major: Web Development
Self-calculated GPA: 3.45/4.00 (credit-weighted).
Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Databases, Front-end Development, Back-end Development, and Software Testing.

PROJECTS

2025 - 2026

The Bad Hats | E-commerce Website
Team Leader | Academic Project
Tech stack: React, TypeScript, React Context, Redux Toolkit, React Router, Axios, JSON Server.
• Built a React single-page application with TypeScript components and client-side routing.
• Managed cart state with React Context/useState and sign-in state with Redux Toolkit.
• Integrated mock APIs with a shared Axios client and added registration and checkout form validation.
• Added client-side route protection for the admin order management interface.
